Education

Northeastern University, Boston, MA — *Sept. 2019 – May 2023*
Khoury College of Computer Sciences
Bachelor of Science in Computer Science

Related Courses Object-Oriented Design, Web Development, Algorithms and Data, Computer Systems, Human Computer Interaction, Foundations of Cybersecurity

Honors Dean's List, Honors Program, Summa Cum Laude **GPA: 3.9/4.0**

Experience

WHOOP · *Boston, MA* — *February 2026 – Present*
Android Engineer II

- Built Kotlin Android features on WHOOP's Growth team that integrate with backend APIs, collaborating with product and backend to ship features that relate to membership and improve user experience.
- Led the migration to a backend-driven bottom navigation bar in the WHOOP Android app, making it faster to ship tab-bar changes such as the Advanced Labs standalone membership.

Wellframe · *Boston, MA* — *March 2024 – February 2026*
Software Engineer

- Led the technical design and development of Wellframe's first member-facing web application, collaborating with a cross-functional team over a year to unlock major new sales opportunities.
- Authored the frontend architecture and tech stack proposal for the Member Web application, which was later adopted as a standard across the organization.

Wellframe · *Boston, MA* — *June 2023 – March 2024*
Associate Software Engineer

- Developed features for Wellframe's Android application to support digital care management, building new and migrated interfaces with Jetpack Compose to improve efficiency and maintainability.
- Participated in release duty, deploying Android and iOS apps for Wellframe and cobranded customers, and monitoring for issues requiring hotfixes.

Skills

Languages Kotlin, Swift, TypeScript, JavaScript, Objective-C, Java, C/C++, Python, HTML

Frameworks React, SwiftUI, Jetpack Compose, MUI

Software Xcode, Android Studio, IntelliJ IDEA, Node.js, Git, LaTeX, Photoshop, Excel

Projects

Pokémon GO Raid Bot — *July 2020 – Present*
Architect & Developer

- Engineered a Discord bot to automate the Pokémon GO raid grouping process, more than doubling raid efficiency and greatly improving user experience.
- Implemented the application using Node.js, the Discord API, and Heroku to ensure sufficient access and stability for an active base of 200,000 server members.
- Revamped the application with a Postgres database, TypeScript conversion, and unit test suite to improve functionality, speed, and scalability.

Interests

Travel, Crossword Puzzles, Retro Games, Pokémon, Chess, French, Hockey
